PRESS RELEASE

DeCurret to Start Offering Market Format Trading API* for automated trading of bitcoins and altcoins

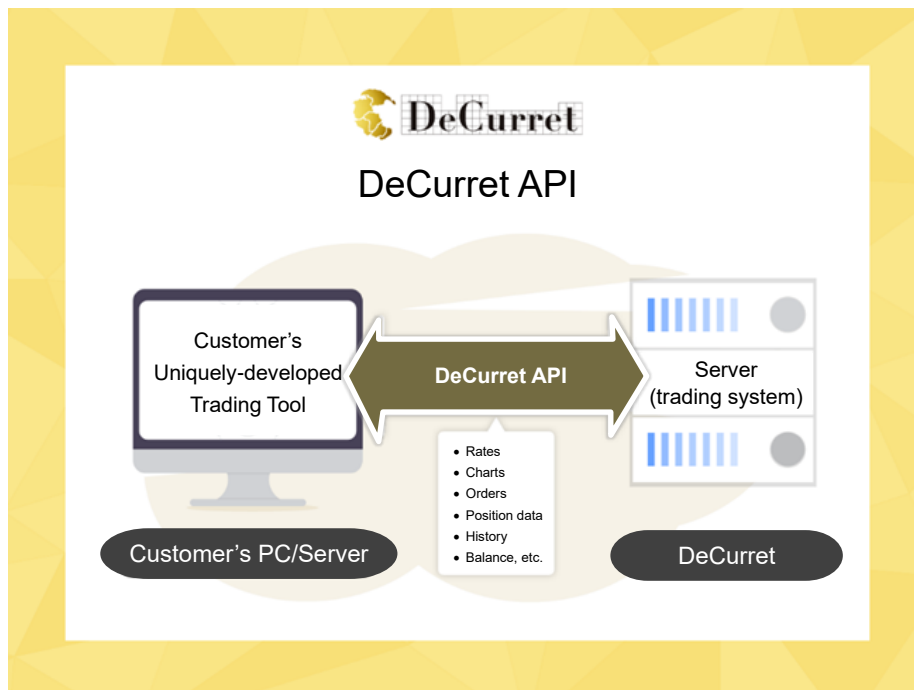

DeCurret Inc. (HQ: Chiyoda ward, Tokyo, President & CEO: Kazuhiro Tokita) is pleased to announce the release of API for spot and leveraged trading on Saturday, March 28, 2020.

Previously, the DeCurret spot and leveraged trading service required manual trading via customers' PC browsers or apps. With the new API, customers can automatically trade bitcoins and altcoins using our program.

The API will offer a more convenient trading environment that matches various customers' trading styles.

Service Overview

Private API will be offered to customers with DeCurret basic account and above.

DeCurret

- Cash status and account balance

■ API details

<https://www.decurret.com/api/>

DeCurret has celebrated its first anniversary. Since the launch of spot trading service in April 2019, we have released leveraged trading service, E-money Recharging service, and leveraged trading platform for iOS and Android, in an effort to provide a more convenient trading environment for our customers and to bring the use of cryptocurrency closer to users. Aiming to become the platform for digital currency, we will work to enhance services that meet the needs of our customers, and increase the range of offerings such as value conversion and exchange functions compatible with existing settlement services.

*API is an acronym for Application Programming Interface.

Business description: Financial services involving trading and settlement of digital currencies
Virtual Currency Exchange Operator - Kanto Local Finance Bureau No. 00016
Member of the Japan Virtual Currency Exchange Association

■ Main risks when trading cryptocurrencies

- A cryptocurrency is neither a Japanese currency nor a foreign currency. The cryptocurrencies we handle are “decentralized cryptocurrencies” traded and issued over the internet, and their values are not guaranteed by any specific states or other parties.
- A cryptocurrency may lose significant value due to fluctuations in the price.
- Differences exist between buying and selling prices in cryptocurrency trades. During times of high market volatility or decreased liquidity, the differences between buying and selling prices may increase, the acceptance of orders may be interrupted, and so on. Customers may therefore be unable to complete transactions as intended.

DeCurret

- A cryptocurrency itself may lose all value due to breakdowns in the systems for transferring the cryptocurrency, or other reasons.
- Leveraged trading enables a customer to make transactions larger than the margin he/she has deposited with us. Thus while there is a possibility of significant profits, there is a corresponding risk of significant losses. Losses are not limited to, and may exceed, the value of the deposit. For details on margins, including the amount of margin required, how to calculate it, and the margin requirement rate, please visit our website.
- The order price displayed in the trade screen at the time the order was placed may differ from the actual contract price. It may be caused when it has taken long for our trading system to execute the order after it is received from the customer, as a result of communication issues between the device of the customer and our trading system, sudden changes in the price of the currency, etc. This may work to the customer's advantage or disadvantage.
- Customers may be unable to complete transactions as intended, due to factors such as malfunctions of communication lines between the customers and the trading system or the cryptocurrency exchange operator.
